PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience building and automating cloud infrastructure on Yandex Cloud, Kubernetes, and Terraform.

Automated production infrastructure deployment, cutting monthly cloud costs by **25%** and eliminating configuration drift entirely.

Core stack: **Kubernetes (k8s), Terraform, GitLab CI/CD, Docker, Ansible, Python, Bash.**

Yandex Cloud Certified Engineer and Astra Linux Certified Administrator; recipient of the Astra Stipend 2026; prize-winner at All-Russian DevOps and InfoSec Olympiads.

SKILLS

Cloud Platforms & Infrastructure:

Yandex Cloud, Terraform, Infrastructure as Code (IaC), Packer

CI/CD & Automation:

GitLab CI/CD, GitHub Actions, Gitflic CI, Ansible

Containerisation & Orchestration:

Docker, Docker Compose, Kubernetes (k8s, k3s, Managed Kubernetes)

Monitoring & Observability:

Grafana, Prometheus, centralised log aggregation

Programming & Scripting:

Python, Bash, C, Rust

Databases:

PostgreSQL

Operating Systems:

Debian, Ubuntu, Astra Linux, Arch Linux, GNU/Linux

Security:

Vulnerability Assessment, iptables, nftables, Kali Linux, Supply Chain Security

WORK EXPERIENCE

SRE / DevOps Engineer

FlowSense (Startup) | June 2025 - July 2025

- Automated production infrastructure provisioning with **Terraform (IaC)** on Yandex Cloud, cutting environment setup time from 4 hours to ~20 minutes.
- Deployed and operated **Kubernetes (k8s)** clusters in production, maintaining **99.5%** service availability.
- Conducted a full cloud resource audit and right-sized configurations, reducing monthly infrastructure spend by **25%** and eliminating manual configuration errors.
- Built **GitLab CI/CD** pipelines covering build, test, and deploy stages - release cycle time cut by approximately 2x.

PROJECTS

ReproCheck - Supply Chain Security System for Astra Linux

December 2025 - May 2026 | Astra Stipend Programme (Astra Group)

- Designed and built from scratch a **reproducible builds** verification system for Astra Linux to harden the software supply chain against tampering.
- Delivered a full-stack solution: **FastAPI + PostgreSQL** backend, Bash/Python tooling for dpkg/dbuild, **Docker + Kubernetes** orchestration, Gitflic CI pipelines.
- Achieved **100%** verification coverage across all target packages in the test repository.
- Presented the findings at the **All-Russian MIM-2026 Conference** (Information Security track); research paper accepted in a peer-reviewed journal.

Additional pet projects, hackathon work, and CTF write-ups: github.com/j4hongir

EDUCATION

Bachelor's Degree - Information Security

University of Tyumen | September 2023 - June 2027 (expected)

Programme: 10.03.01 - Information Security | Specialisation: Computer Systems Security

CERTIFICATIONS

- Astra Linux Certified Administrator - AL-1701, AL-1702, AL-1703 | 2025
- Yandex Cloud Certified Engineer - Yandex Cloud Platform | 2025
- Information Security Specialist - Echelon | 2025
- Network Technologies Certification - Eltex | 2025

Full certification portfolio: jahongir.ru/certs

ACHIEVEMENTS & AWARDS

- 2nd Place - DevOps track, All-Russian Olympiad "Trajectory of the Future" | 2025
- Finalist - Information Security track, All-Russian Olympiad "Trajectory of the Future" | 2025
- Astra Stipend recipient (Astra Group) | 2026
- Participant - All-Russian Olympiads: IT-Planet, Digital Marathon (Linux Administration, Networking, InfoSec) | 2025
- CTF competitor - UralCTF, SasCTF, Standoff365
- Speaker - All-Russian MIM-2026 Conference, "Reproducible Builds as a Defence Against Supply Chain Attacks"
- Peer-reviewed journal publication accepted - Reproducible Builds & Supply Chain Security | 2026
